

## ABSTRACT

5 A printhead assembly is provided, comprising at least one printhead module comprising at least two  
printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the  
surface of print media, and a support member supporting the at least two printhead integrated circuits, and a  
casing in which the at least one printhead module is removably mounted. The support member has at least one  
longitudinally extending channel for carrying the printing fluid for the printhead integrated circuits, and two  
fluid connectors are provided to each connect with a longitudinal end of the at least one printhead module,  
each of the fluid connectors being arranged to connect at least one fluid delivery hose from a fluid supply to  
10 the at least one channel at the corresponding longitudinal end of the at least one printhead module.
